## **The Truth About Creation**

*A Christian Scientist Perspective*

**“Mommy, Why is Billy so special?”**

Many of us have met a “special” person and all of us know about the dinosaurs, but most people don’t know of the link between them. In fact, these two seemingly unrelated creatures hold ***the key to the survival of humans!!!***

When God created the Earth, he let Jesus help create some of the animals. Jesus created dinosaurs with huge hearts, an embodiment of love, peace, and happiness. Unfortunately, their brains were a little small...

These very special creatures fell victim to many perils because they were so “special”, such those who became trapped in the infamous La Brea Tar Pits. This flaw made them unable to survive as a species.

After the dinosaurs became extinct, future species were given larger brains to avoid these mistakes. None, however, were as sweet or as loveable as the dinosaurs. Jesus was heartbroken and eventually started sending the souls of dinosaurs down to human bodies to bring some of the love and kindness back to man. These souls become people like Billy. These people are preferred by God and hold the key to our salvation.

**“So you see, Bobby, that your father and I wanted to make Jesus happy. That’s why we have you and Billy and Sally and Susie and Mark and Nathaniel and Jane and Hannah and John and Adam and hopefully many more! We know that Jesus is happy because he trusted us with a dinosaur soul. We also know that we are helping to save mankind by making sure our race never becomes extinct! One day, you can please God too, by having as many children as possible! “**
